CHAPTER 1

MATHEMAGIC

1.1 LO-SHU AND MAGIC SQUARES

Magic squares were fun for China's Lo-Shu. I hope they are the same for Yu Kno-Whoo .

The numbers 1 through 9 are used in Lo-Shu's 3 by 3 magic square . Add the numbers in each row, column and diagonal . Write each sum .

1.

6	7	2
1	5	9
8	3	4

$$\begin{array}{r} 2 \\ 5 \\ +8 \\ \hline \end{array}$$

$$\begin{array}{r} 6 \\ 5 \\ +4 \\ \hline \end{array}$$

$$\begin{array}{r} 1 \\ 5 \\ +9 \\ \hline \end{array}$$

$$\begin{array}{r} 6 \\ 7 \\ +2 \\ \hline \end{array}$$

The numbers 1 through 9 are used in Lo-Shu's 3 by 3 magic square. Add the numbers in each row, column and diagonal . Write each sum .

2.

$$\begin{array}{r} 8 \\ 3 \\ +4 \\ \hline \end{array}$$

$$\begin{array}{r} 1 \\ 5 \\ +9 \\ \hline \end{array}$$

$$\begin{array}{r} 6 \\ 7 \\ +2 \\ \hline \end{array}$$

8	3	4
1	5	9
6	7	2

$$\begin{array}{r} 4 \\ 5 \\ +6 \\ \hline \end{array}$$

$$\begin{array}{r} 8 \\ 5 \\ +2 \\ \hline \end{array}$$

The numbers 1 through 16 are used in the 4 by 4 magic square .
Add the numbers in each row , column and diagonal . Write each sum .

3.

11	2	14	7
8	13	1	12
5	16	4	9
10	3	15	6

$$\begin{array}{r} 7 \\ 1 \\ 16 \\ + 10 \\ \hline \end{array}$$

$$\begin{array}{r} 10 \\ 3 \\ 15 \\ + 6 \\ \hline \end{array}$$

$$\begin{array}{r} 11 \\ 13 \\ 4 \\ + 6 \\ \hline \end{array}$$

$$\begin{array}{r} 5 \\ 16 \\ 4 \\ + 9 \\ \hline \end{array}$$

$$\begin{array}{r} 8 \\ 13 \\ 1 \\ + 12 \\ \hline \end{array}$$

$$\begin{array}{r} 11 \\ 2 \\ 14 \\ + 7 \\ \hline \end{array}$$

The numbers 1 through 16 are used in the 4 by 4 magic square .
Add the numbers in each row , column and diagonal . Write each sum .

4.

16	3	2	13
5	10	11	8
9	6	7	12
4	15	14	1

$$\begin{array}{r} 13 \\ 11 \\ 6 \\ + 4 \\ \hline \end{array}$$

$$\begin{array}{r} 4 \\ 15 \\ 14 \\ + 1 \\ \hline \end{array}$$

$$\begin{array}{r} 16 \\ 10 \\ 7 \\ + 1 \\ \hline \end{array}$$

$$\begin{array}{r} 9 \\ 6 \\ 7 \\ + 12 \\ \hline \end{array}$$

$$\begin{array}{r} 5 \\ 10 \\ 11 \\ + 8 \\ \hline \end{array}$$

$$\begin{array}{r} 16 \\ 3 \\ 2 \\ + 13 \\ \hline \end{array}$$

The numbers 1 through 25 are used in the 5 by 5 magic square .
Add the numbers in each row, column and diagonal . Write each sum .

5.

17	24	1	8	15
23	5	7	14	16
4	6	13	20	22

1.2 MAGIC TRIANGLES

Simple triangles, as is well known,
Charm with special magic all their own.

Seth Side and Annie Angle found some magic triangles.
Add the numbers on each side and base. Write each sum.

7.

8.

9.

10.

11.

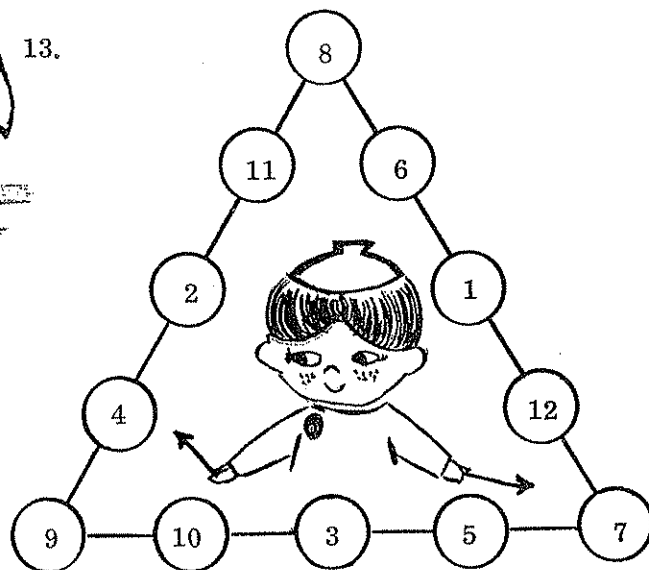

12.

Side	Base	Side
4	5	4
9	8	11
1	2	3
12	10	7
<u>+ 5</u>	<u>+ 6</u>	<u>+ 6</u>

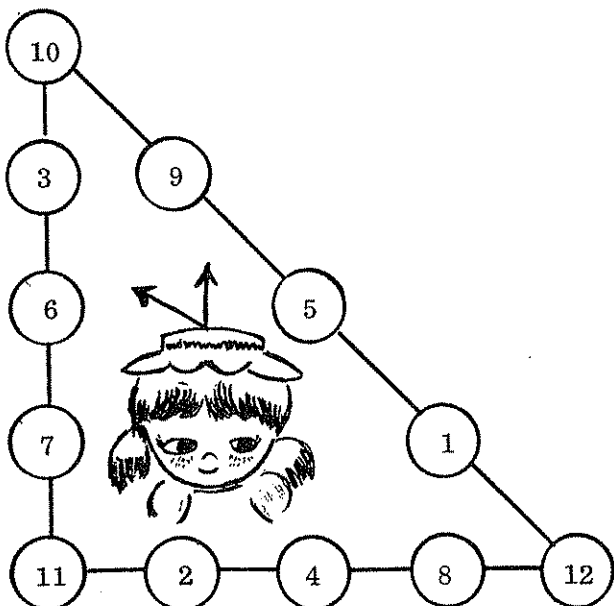

13.

Side	Base	Side
8	9	8
11	10	6
2	3	1
4	5	12
<u>+ 9</u>	<u>+ 7</u>	<u>+ 7</u>

14.

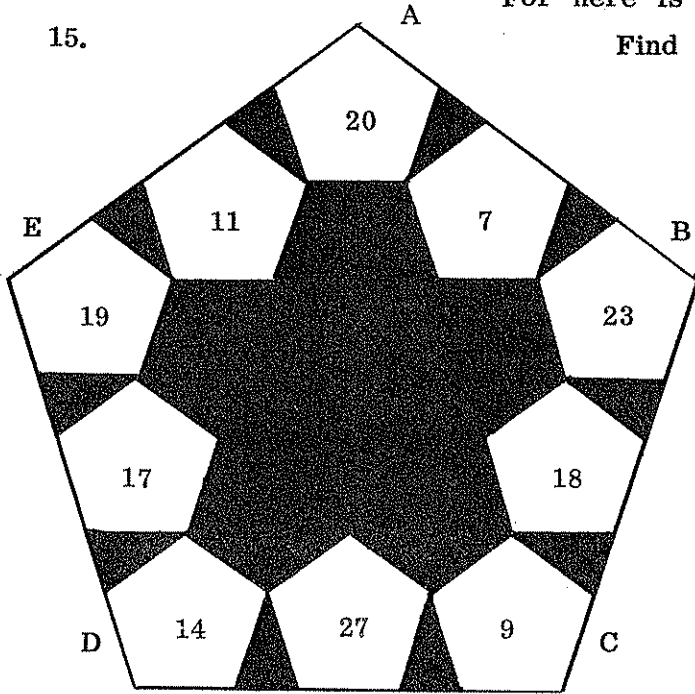

Side	Base	Hypotenuse
10	11	10
3	2	9
6	4	5
7	8	1
<u>+ 11</u>	<u>+ 12</u>	<u>+ 12</u>

1.3 MAGIC PENTAGONS

The mystery is not all gone,
For here is the magic pentagon.
Find the sums.

15.

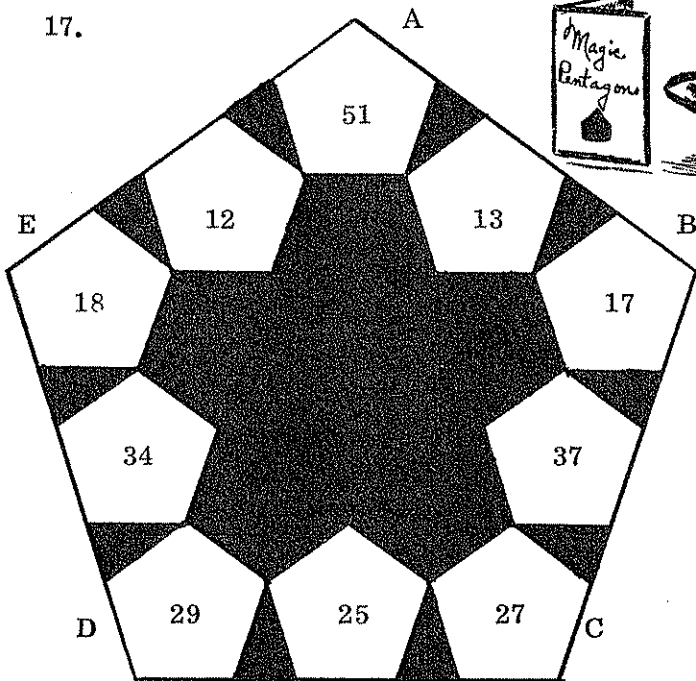

A	B	C	D	E
19	20	23	9	14
11	7	18	27	17
<u>+ 20</u>	<u>+ 23</u>	<u>+ 9</u>	<u>+ 14</u>	<u>+ 19</u>

16.

A	B	C	D	E
11	32	18	16	41
24	17	33	10	15
<u>+ 32</u>	<u>+ 18</u>	<u>+ 16</u>	<u>+ 41</u>	<u>+ 11</u>

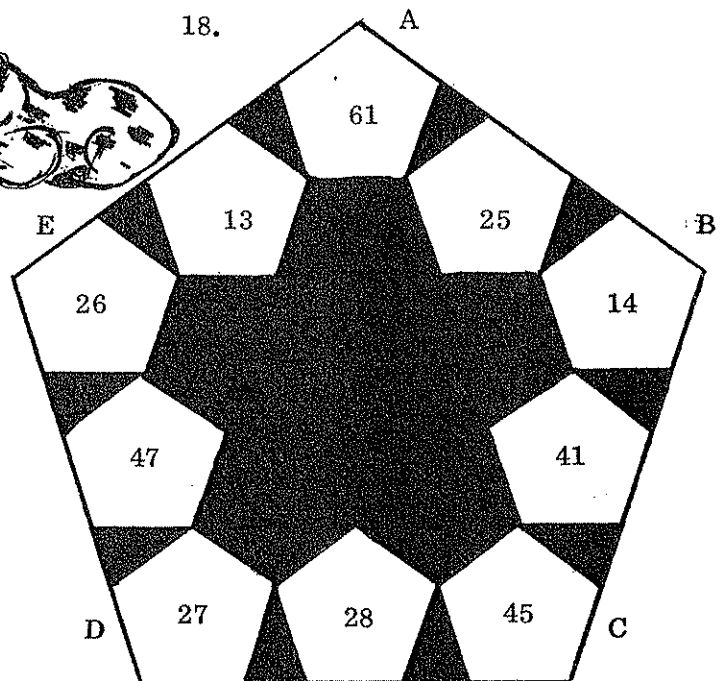

17.

A	B	C	D	E
18	51	17	27	29
12	13	37	25	34
<u>+ 51</u>	<u>+ 17</u>	<u>+ 27</u>	<u>+ 29</u>	<u>+ 18</u>

18.

A	B	C	D	E
26	61	14	45	27
13	25	41	28	47
<u>+ 61</u>	<u>+ 14</u>	<u>+ 45</u>	<u>+ 27</u>	<u>+ 26</u>

1.4 TINY TWINKLE AND MAGIC STARS

Twinkle, twinkle magic star,
Tiny makes you what you are!

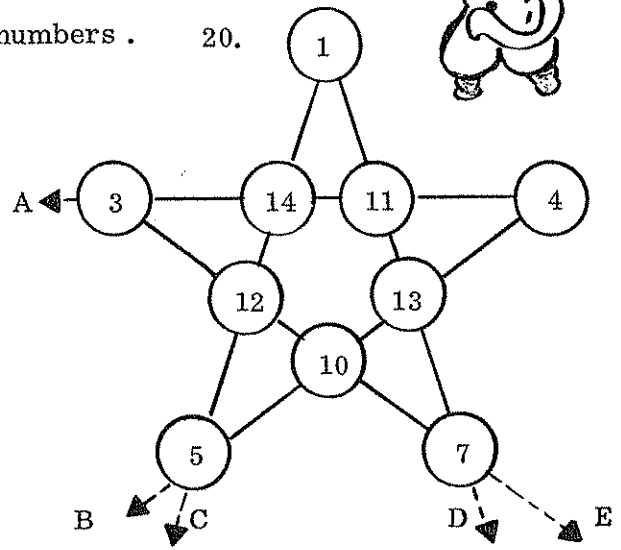

19.

A	B	C	D	E
10	9	12	12	10
1	2	1	4	3
4	5	3	2	5
<u>+ 9</u>	<u>+ 8</u>	<u>+ 8</u>	<u>+ 6</u>	<u>+ 6</u>

20.

A	B	C	D	E
3	4	1	1	3
14	13	14	11	12
11	10	12	13	10
<u>+ 4</u>	<u>+ 5</u>	<u>+ 5</u>	<u>+ 7</u>	<u>+ 7</u>

21.

A	B	C	D	E
17	16	19	19	17
6	7	6	9	8
9	10	8	7	10
<u>+ 16</u>	<u>+ 15</u>	<u>+ 15</u>	<u>+ 13</u>	<u>+ 13</u>

22.

A	B	C	D	E
21	20	23	23	21
6	7	6	9	8
9	10	8	7	10
<u>+ 20</u>	<u>+ 19</u>	<u>+ 19</u>	<u>+ 17</u>	<u>+ 17</u>

Add another twinkle from afar,
And you have a magic six point star!

23.

$$\begin{array}{r} A \\ 5 \\ 1 \\ 0 \\ + 11 \\ \hline \end{array}$$

$$\begin{array}{r} B \\ 3 \\ 4 \\ 2 \\ + 8 \\ \hline \end{array}$$

$$\begin{array}{r} C \\ 6 \\ 0 \\ 3 \\ + 8 \\ \hline \end{array}$$

$$\begin{array}{r} D \\ 5 \\ 7 \\ 4 \\ + 1 \\ \hline \end{array}$$

$$\begin{array}{r} E \\ 11 \\ 3 \\ 2 \\ + 1 \\ \hline \end{array}$$

$$\begin{array}{r} F \\ 6 \\ 1 \\ 7 \\ + 3 \\ \hline \end{array}$$

24.

$$\begin{array}{r} A \\ 3 \\ 6 \\ 5 \\ + 12 \\ \hline \end{array}$$

$$\begin{array}{r} B \\ 7 \\ 8 \\ 1 \\ + 10 \\ \hline \end{array}$$

$$\begin{array}{r} C \\ 9 \\ 5 \\ 2 \\ + 10 \\ \hline \end{array}$$

$$\begin{array}{r} D \\ 3 \\ 4 \\ 8 \\ + 11 \\ \hline \end{array}$$

$$\begin{array}{r} E \\ 12 \\ 2 \\ 1 \\ + 11 \\ \hline \end{array}$$

$$\begin{array}{r} F \\ 9 \\ 6 \\ 4 \\ + 7 \\ \hline \end{array}$$

I saw a falling star last night,
The sky was bright with magic light.

CHAPTER 2

MYSTERIOUS NUMBER PATTERNS

2.1 MAGIC GUESSING - NUMBERS

Multiply and add, divide and subtract,
With work done, at the start you are back.

Take a number	(3)
Multiply by 2	$2 \times 3 = 6$
Add 2	$6 + 2 = 8$
Divide by 2	$8 \div 2 = 4$
Subtract 1	$4 - 1 = (3)$

Dini Dunit does it briefly. You do it too.

52.

Take →	(4)	(5)	(6)	(8)	(10)	(11)	(13)	(14)	(15)
Multiply by 2	8								
Add 2	10								
Divide by 2	5								
Subtract 1	(4)								

53.

As you can easily see, it also works for three.

Take →	(2)	(3)	(4)	(5)	(7)	(8)	(9)	(10)	(11)
Multiply by 3	6								
Add 3	9								
Divide by 3	3								
Subtract 1	(2)								

54.

To see it work for more, now try four .

Take →	4	5	6	7	8	9	11	12	13
Multiply by 4	16								
Add 4	20								
Divide by 4	5								
Subtract 1	4								

55.

Five is easy, as you can see .

Take →	3	4	5	6	8	9	11	12	14
Multiply by 5	15								
Add 5	20								
Divide by 5	4								
Subtract 1	3								

56.

Magic more - if mistakes you don't mix with six .

Take →	5	6	7	9	10	11	13	15	17
Multiply by 6	30								
Add 6	36								
Divide by 6	6								
Subtract 1	5								

Seven needs a little care, so beware.

57.

Take \rightarrow	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(12)	(14)
Multiply by 7	28								
Add 7	35								
Divide by 7	5								
Subtract 1	(4)								

To keep your figuring straight, try eight.

58.

Take \rightarrow	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(12)
Multiply by 8	24								
Add 8	32								
Divide by 8	4								
Subtract 1	(3)								

With zeros you've had fun, if with ten you're done.

59.

Take \rightarrow	(4)	(5)	(6)	(9)	(10)	(11)	(12)	(15)	(16)
Multiply by 10	40								
Add 10	50								
Divide by 10	5								
Subtract 1	(4)								

Add and multiply , then add again -- divide, subtract,
Some magic you will show if your figures are exact .

Take a number	(2)
Add (3)	$2 + 3 = 5$
Multiply by 3	$3 \times 5 = 15$
Add 3	$15 + 3 = 18$
Divide by 3	$18 \div 3 = 6$
Subtract your number	$6 - 2 = (4)$

3

60,

Take →	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(12)	(14)
Add (3)	7								
Multiply by 3	21								
Add 3	24								
Divide by 3	8								
Subtract your number	(4)								

4

61,

Take →	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)
Add (4)	8								
Multiply by 4	32								
Add 4	36								
Divide by 4	9								
Subtract your number	(5)								

62.

Take 	(3)	(4)	(5)	(6)	(7)	(8)	(10)	(11)	(12)
Add (5)	8								
Multiply by 5	40								
Add 5	45								
Divide by 5	9								
Subtract your number	(6)								

5

63.

Take 	(3)	(4)	(5)	(6)	(7)	(8)	(10)	(11)	(12)
Add (7)	10								
Multiply by 7	70								
Add 7	77								
Divide by 7	11								
Subtract your number	(8)								

7

64.

Take 	(3)	(5)	(7)	(9)	(10)	(11)	(12)	(14)	(15)
Add (10)	13								
Multiply by 10	130								
Add 10	140								
Divide by 10	14								
Subtract your number	(11)								

1

2.2 ROE KOLUM'S MAGIC SUMS

Roe found delightful magic in a sum,
Each row turned out to be a column.

2	1	3		2	1	3		2	1	3	
+	1	4	5	+	1	4	5	+	1	4	5
3	5	8		3	5	8		3	5	8	

65.

$$\begin{array}{r} 549 \\ + 427 \\ \hline \end{array}$$

66.

$$\begin{array}{r} 437 \\ + 326 \\ \hline \end{array}$$

67.

$$\begin{array}{r} 314 \\ + 112 \\ \hline \end{array}$$

68.

$$\begin{array}{r} 279 \\ + 719 \\ \hline \end{array}$$

69.

$$\begin{array}{r} 268 \\ + 618 \\ \hline \end{array}$$

70.

$$\begin{array}{r} 157 \\ + 550 \\ \hline \end{array}$$

71.

$$\begin{array}{r} 718 \\ + 113 \\ \hline \end{array}$$

72.

$$\begin{array}{r} 326 \\ + 280 \\ \hline \end{array}$$

73.

$$\begin{array}{r} 639 \\ + 359 \\ \hline \end{array}$$

74.

$$\begin{array}{r} 819 \\ + 124 \\ \hline \end{array}$$

75.

$$\begin{array}{r} 337 \\ + 381 \\ \hline \end{array}$$

76.

$$\begin{array}{r} 909 \\ + 056 \\ \hline \end{array}$$

2.3 MR. REE'S MAGIC TABLE 1

A number table from Mr. Ree,
With magic as old as history .

A	B	C	D
1	2	4	8
3	3	5	9
5	6	6	10
7	7	7	11
9	10	12	12
11	11	13	13
13	14	14	14
15	15	15	15

Mr. Ree said to Dubee Doubtful :

Pick a number from 1 to 15 . Tell me
the columns where your number appears.

Dubee picked 3 and told Mr. Ree :

My number is in columns A and B .

Mr. Ree said to Dubee Doubtful :

The number you picked is 3 .

How did Mr. Ree find it ?

Add the numbers in the first row of
the columns where Dubee says her
number appears .

77. Find Dubee's number !

Dubee says her number is in columns	Her number is
D	
B, C	
A, B, D	
A, C, D	
C, D	
B, C, D	
A, B, C, D	

2.4 MR. REE'S MAGIC TABLE 2

If this number table you take,
New magic for your friends you'll make.

A	B	C	D	E
1	2	3	6	9
4	5	4	7	10
7	8	5	8	11
10	11	12	16	12
13	14	13	17	13
15	15	14	18	14
16	17	15	19	15
19	20	18	20	16
21	21	19	21	17
		20		18
		21		19
				20
				21

Dubee Doubtful picks a number from 1 to 21. She tells you the columns where her number appears. Add the numbers in the first row of Dubee's columns.

78.

Dubee says her number is in columns	Her number is
B, E	
A, C, E	
A, B, C, E	
A, D, E	
A, C, D, E	
B, C, D, E	
A, B, C, D, E	

2.5 MYSTERIOUS 99

Reverse and subtract, now reverse and add.
A little magic you'll find that's not bad.

79.

$$\begin{array}{r} 10 \\ - 01 \\ \hline 09 \\ + 90 \\ \hline 99 \end{array}$$

80.

$$\begin{array}{r} 20 \\ - 02 \\ \hline 18 \\ + 81 \\ \hline 99 \end{array}$$

81.

$$\begin{array}{r} 21 \\ - 12 \\ \hline 09 \\ + 90 \\ \hline 99 \end{array}$$

82.

$$\begin{array}{r} 31 \\ - 13 \\ \hline \\ + \\ \hline \end{array}$$

83.

$$\begin{array}{r} 42 \\ - 24 \\ \hline \\ + \\ \hline \end{array}$$

84.

$$\begin{array}{r} 51 \\ - 15 \\ \hline \\ + \\ \hline \end{array}$$

85.

$$\begin{array}{r} 53 \\ - 35 \\ \hline \\ + \\ \hline \end{array}$$

86.

$$\begin{array}{r} 60 \\ - 06 \\ \hline \\ + \\ \hline \end{array}$$

87.

$$\begin{array}{r} 64 \\ - 46 \\ \hline \\ + \\ \hline \end{array}$$

88.

$$\begin{array}{r} 71 \\ - 17 \\ \hline \\ + \\ \hline \end{array}$$

89.

$$\begin{array}{r} 75 \\ - 57 \\ \hline \\ + \\ \hline \end{array}$$

90.

$$\begin{array}{r} 82 \\ - 28 \\ \hline \\ + \\ \hline \end{array}$$

91.

$$\begin{array}{r} 84 \\ - 48 \\ \hline \\ + \\ \hline \end{array}$$

92.

$$\begin{array}{r} 86 \\ - 68 \\ \hline \\ + \\ \hline \end{array}$$

93.

$$\begin{array}{r} 93 \\ - 39 \\ \hline \\ + \\ \hline \end{array}$$

94.

$$\begin{array}{r} 95 \\ - 59 \\ \hline \\ + \\ \hline \end{array}$$

2.6 PALINDROMIC NUMBERS

Abadaba wrote 1 2 1
2 3 3 2 .

The numbers 1 2 1 and 2 3 3 2 have digits that read the same from left to right and from right to left . Abadaba called such numbers palindromic numbers.

Find the sums that are palindromes .

Find differences that are palindromes .

95.

Sums	Palindrome Check	
	Yes	No
$\begin{array}{r} 47 \\ + 74 \\ \hline \end{array}$		
$\begin{array}{r} 83 \\ + 67 \\ \hline \end{array}$		
$\begin{array}{r} 127 \\ + 75 \\ \hline \end{array}$		
$\begin{array}{r} 235 \\ + 78 \\ \hline \end{array}$		
$\begin{array}{r} 134 \\ + 643 \\ \hline \end{array}$		
$\begin{array}{r} 136 \\ + 256 \\ \hline \end{array}$		
$\begin{array}{r} 273 \\ + 383 \\ \hline \end{array}$		

96.

Differences	Palindrome Check	
	Yes	No
$\begin{array}{r} 73 \\ - 18 \\ \hline \end{array}$		
$\begin{array}{r} 82 \\ - 17 \\ \hline \end{array}$		
$\begin{array}{r} 78 \\ - 34 \\ \hline \end{array}$		
$\begin{array}{r} 94 \\ - 28 \\ \hline \end{array}$		
$\begin{array}{r} 119 \\ - 87 \\ \hline \end{array}$		
$\begin{array}{r} 122 \\ - 78 \\ \hline \end{array}$		
$\begin{array}{r} 347 \\ - 115 \\ \hline \end{array}$		

Find products that are palindromes.

97.

Products	Palindrome Check	
	Yes	No
$\begin{array}{r} 136 \\ \times \quad 4 \\ \hline \end{array}$		
$\begin{array}{r} 113 \\ \times \quad 5 \\ \hline \end{array}$		
$\begin{array}{r} 47 \\ \times \quad 6 \\ \hline \end{array}$		
$\begin{array}{r} 123 \\ \times \quad 7 \\ \hline \end{array}$		
$\begin{array}{r} 58 \\ \times \quad 8 \\ \hline \end{array}$		
$\begin{array}{r} 65 \\ \times \quad 9 \\ \hline \end{array}$		
$\begin{array}{r} 111 \\ \times \quad 11 \\ \hline \end{array}$		
$\begin{array}{r} 37 \\ \times \quad 24 \\ \hline \end{array}$		

Find quotients that are palindromes.

98.

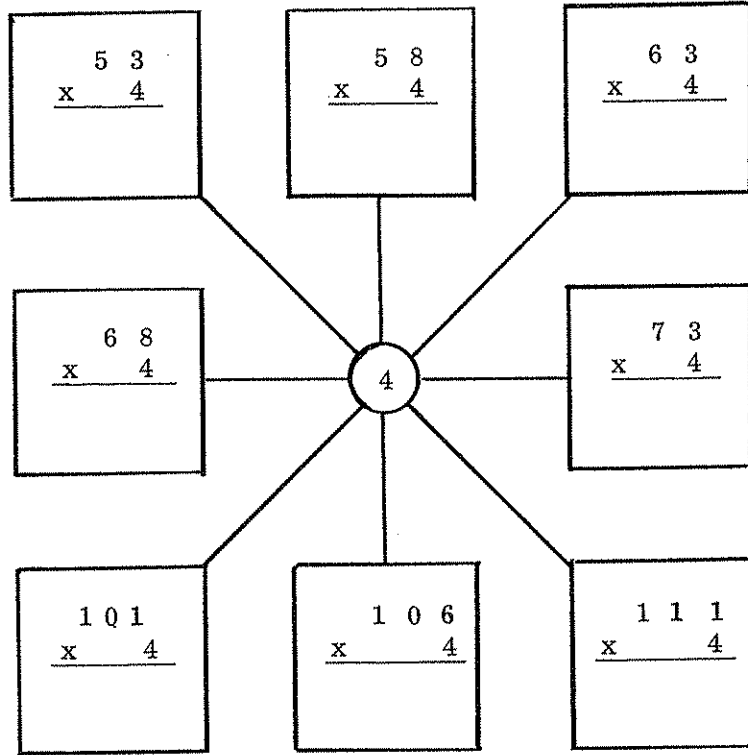

Quotients	Palindrome Check	
	Yes	No
$2 \overline{)564}$		
$3 \overline{)759}$		
$4 \overline{)1252}$		
$5 \overline{)1055}$		
$6 \overline{)2844}$		
$7 \overline{)4025}$		
$8 \overline{)6296}$		
$9 \overline{)7902}$		

Abadaba found numbers, and here are more
That give palindromes when multiplied by four.

99.

Multiply by six the numbers round about,
Palindromes you'll find without a doubt.

100.

To find palindromes by reversing and adding is clever,
But must we do these steps over forever and ever ?

Take 2 3
Reverse and add $\begin{array}{r} + 3 2 \\ \hline 5 5 \end{array}$

Palindrome in 1 reversal ,

Take 1 9
Reverse and add $\begin{array}{r} + 9 1 \\ \hline 1 1 0 \end{array}$

Reverse and add $\begin{array}{r} + 0 1 1 \\ \hline 1 2 1 \end{array}$

Palindrome in 2 reversals .

Follow Abadaba .

101.

$$\begin{array}{r} 5 4 \\ + 4 5 \\ \hline \end{array}$$

102.

$$\begin{array}{r} 6 1 \\ + 1 6 \\ \hline \end{array}$$

103.

$$\begin{array}{r} 1 1 2 \\ + 2 1 1 \\ \hline \end{array}$$

104.

$$\begin{array}{r} 2 3 1 \\ + 1 3 2 \\ \hline \end{array}$$

105.

$$\begin{array}{r} 3 1 1 \\ + 1 1 3 \\ \hline \end{array}$$

106.

$$\begin{array}{r} 3 4 6 \\ + 6 4 3 \\ \hline \end{array}$$

107.

$$\begin{array}{r} 4 1 1 \\ + 1 1 4 \\ \hline \end{array}$$

108.

$$\begin{array}{r} 5 3 2 \\ + 2 3 5 \\ \hline \end{array}$$

109.

$$\begin{array}{r} 6 1 2 \\ + 2 1 6 \\ \hline \end{array}$$

110.

$$\begin{array}{r} 7 3 1 \\ + 1 3 7 \\ \hline \end{array}$$

111.

$$\begin{array}{r} 8 2 1 \\ + 1 2 8 \\ \hline \end{array}$$

112.

$$\begin{array}{r} 9 0 2 \\ + 2 0 9 \\ \hline \end{array}$$

Follow Abadaba.

113.

$$\begin{array}{r} 58 \\ + 85 \\ \hline \end{array}$$

114.

$$\begin{array}{r} 93 \\ + 39 \\ \hline \end{array}$$

115.

$$\begin{array}{r} 159 \\ + 951 \\ \hline \end{array}$$

116.

$$\begin{array}{r} 172 \\ + 271 \\ \hline \end{array}$$

117.

$$\begin{array}{r} 218 \\ + 812 \\ \hline \end{array}$$

118.

$$\begin{array}{r} 251 \\ + 152 \\ \hline \end{array}$$

119.

$$\begin{array}{r} 356 \\ + 653 \\ \hline \end{array}$$

120.

$$\begin{array}{r} 371 \\ + 173 \\ \hline \end{array}$$

121.

$$\begin{array}{r} 457 \\ + 754 \\ \hline \end{array}$$

122.

$$\begin{array}{r} 472 \\ + 274 \\ \hline \end{array}$$

123.

$$\begin{array}{r} 553 \\ + 355 \\ \hline \end{array}$$

124.

$$\begin{array}{r} 561 \\ + 165 \\ \hline \end{array}$$

125.

$$\begin{array}{r} 604 \\ + 406 \\ \hline \end{array}$$

126.

$$\begin{array}{r} 664 \\ + 466 \\ \hline \end{array}$$

127.

$$\begin{array}{r} 715 \\ + 517 \\ \hline \end{array}$$

128.

$$\begin{array}{r} 764 \\ + 467 \\ \hline \end{array}$$

129.

$$\begin{array}{r} 815 \\ + 518 \\ \hline \end{array}$$

130.

$$\begin{array}{r} 903 \\ + 309 \\ \hline \end{array}$$

Assign consecutive numbers to the letters of the English alphabet .

A	B	C	D	E	F	G	H	I	J	K	L	M
1	2	3	4	5	6	7	8	9	10	11	12	13
N	O	P	Q	R	S	T	U	V	W	X	Y	Z
14	15	16	17	18	19	20	21	22	23	24	25	26

Palindromes in names you'll see ,
Replace the letters - that's the mystery .

131. ALLEN

A	1

CHAPTER 3
CURIOUS NUMBER PATTERNS

3.1 ADDITION TABLE - ROW, DIAGONAL PATTERNS

The addition table has a simple pattern,
And curious things you'll learn with Seymour Patton.

Pat Patton and her brother Seymour Patton made up an addition table.

ADDITION TABLE

+	0	1	2	3	4	5	6	7	8	9
0	0	1	2	3	4	5	6	7	8	9
1	1	2	3	4	5	6	7	8	9	10
2	2	3	4	5	6	7	8	9	10	11
3	3	4	5	6	7	8	9	10	11	12
4	4	5	6	7	8	9	10	11	12	13
5	5	6	7	8	9	10	11	12	13	14
6	6	7	8	9	10	11	12	13	14	15
7	7	8	9	10	11	12	13	14	15	16
8	8	9	10	11	12	13	14	15	16	17
9	9	10	11	12	13	14	15	16	17	18

Seymour Patton says: Blocks of numbers in rows and diagonals neat,
To find the sum, here's a pattern hard to beat.

Take a block of 3 numbers in a row from the table	<table border="1" style="margin: auto;"> <tr> <td style="padding: 2px 10px;">4</td> <td style="padding: 2px 10px;">5</td> <td style="padding: 2px 10px;">6</td> </tr> </table>	4	5	6
4	5	6		
Take the center number of the block	5			
Multiply the center number by 3	$3 \times 5 = \underline{15}$			
Seymour found that 15 is the sum of the 3 numbers in the block.				

161. Now your turn to try it. Multiply and check it.

Take →	5 6 7	7 8 9	8 9 10	9 10 11	10 11 12
Center number	6	8	9	10	11
Multiply by 3	$\begin{array}{r} 6 \\ \times 3 \\ \hline \end{array}$	$\begin{array}{r} 8 \\ \times 3 \\ \hline \end{array}$	$\begin{array}{r} 9 \\ \times 3 \\ \hline \end{array}$	$\begin{array}{r} 10 \\ \times 3 \\ \hline \end{array}$	$\begin{array}{r} 11 \\ \times 3 \\ \hline \end{array}$
<u>Check</u>	$\begin{array}{r} 5 \\ 6 \\ + 7 \\ \hline \end{array}$	$\begin{array}{r} 7 \\ 8 \\ + 9 \\ \hline \end{array}$	$\begin{array}{r} 8 \\ 9 \\ + 10 \\ \hline \end{array}$	$\begin{array}{r} 9 \\ 10 \\ + 11 \\ \hline \end{array}$	$\begin{array}{r} 10 \\ 11 \\ + 12 \\ \hline \end{array}$

162.

Take →	11 12 13	12 13 14	13 14 15	15 16 17	16 17 18
Center number	12	13	14	16	17
Multiply by 3	$\begin{array}{r} 12 \\ \times 3 \\ \hline \end{array}$	$\begin{array}{r} 13 \\ \times 3 \\ \hline \end{array}$	$\begin{array}{r} 14 \\ \times 3 \\ \hline \end{array}$	$\begin{array}{r} 16 \\ \times 3 \\ \hline \end{array}$	$\begin{array}{r} 17 \\ \times 3 \\ \hline \end{array}$
<u>Check</u>	$\begin{array}{r} 11 \\ 12 \\ + 13 \\ \hline \end{array}$	$\begin{array}{r} 12 \\ 13 \\ + 14 \\ \hline \end{array}$	$\begin{array}{r} 13 \\ 14 \\ + 15 \\ \hline \end{array}$	$\begin{array}{r} 15 \\ 16 \\ + 17 \\ \hline \end{array}$	$\begin{array}{r} 16 \\ 17 \\ + 18 \\ \hline \end{array}$

163.

Try these. The same pattern you'll see.

Take →	22 23 24	31 32 33	33 34 35	44 45 46	65 66 67
Center number	23	32	34	45	66
Multiply by 3	$\begin{array}{r} 23 \\ \times 3 \\ \hline \end{array}$	$\begin{array}{r} 32 \\ \times 3 \\ \hline \end{array}$	$\begin{array}{r} 34 \\ \times 3 \\ \hline \end{array}$	$\begin{array}{r} 45 \\ \times 3 \\ \hline \end{array}$	$\begin{array}{r} 66 \\ \times 3 \\ \hline \end{array}$
<u>Check</u>	$\begin{array}{r} 22 \\ 23 \\ + 24 \\ \hline \end{array}$	$\begin{array}{r} 31 \\ 32 \\ + 33 \\ \hline \end{array}$	$\begin{array}{r} 33 \\ 34 \\ + 35 \\ \hline \end{array}$	$\begin{array}{r} 44 \\ 45 \\ + 46 \\ \hline \end{array}$	$\begin{array}{r} 65 \\ 66 \\ + 67 \\ \hline \end{array}$

Take a block of 3 numbers along a diagonal in the addition table .

3 numbers in diagonal block now you see .

The sum ? Multiply the center number by 3 .

Try these .

Try these .

164.

	3 times center number	Check
8 10 12	$\begin{array}{r} 10 \\ \times 3 \\ \hline \end{array}$	$\begin{array}{r} 8 \\ 10 \\ + 12 \\ \hline \end{array}$
9 11 13	$\begin{array}{r} 11 \\ \times 3 \\ \hline \end{array}$	$\begin{array}{r} 9 \\ 11 \\ + 13 \\ \hline \end{array}$
10 12 14	$\begin{array}{r} 12 \\ \times 3 \\ \hline \end{array}$	$\begin{array}{r} 10 \\ 12 \\ + 14 \\ \hline \end{array}$
11 13 15	$\begin{array}{r} 13 \\ \times 3 \\ \hline \end{array}$	$\begin{array}{r} 11 \\ 13 \\ + 15 \\ \hline \end{array}$
13 15 17	$\begin{array}{r} 15 \\ \times 3 \\ \hline \end{array}$	$\begin{array}{r} 13 \\ 15 \\ + 17 \\ \hline \end{array}$
14 16 18	$\begin{array}{r} 16 \\ \times 3 \\ \hline \end{array}$	$\begin{array}{r} 14 \\ 16 \\ + 18 \\ \hline \end{array}$

165.

	3 times center number	Check
20 22 24	$\begin{array}{r} 22 \\ \times 3 \\ \hline \end{array}$	$\begin{array}{r} 20 \\ 22 \\ + 24 \\ \hline \end{array}$
23 25 27	$\begin{array}{r} 25 \\ \times 3 \\ \hline \end{array}$	$\begin{array}{r} 23 \\ 25 \\ + 27 \\ \hline \end{array}$
36 38 40	$\begin{array}{r} 38 \\ \times 3 \\ \hline \end{array}$	$\begin{array}{r} 36 \\ 38 \\ + 40 \\ \hline \end{array}$
45 47 49	$\begin{array}{r} 47 \\ \times 3 \\ \hline \end{array}$	$\begin{array}{r} 45 \\ 47 \\ + 49 \\ \hline \end{array}$
48 50 52	$\begin{array}{r} 50 \\ \times 3 \\ \hline \end{array}$	$\begin{array}{r} 48 \\ 50 \\ + 52 \\ \hline \end{array}$
59 61 63	$\begin{array}{r} 61 \\ \times 3 \\ \hline \end{array}$	$\begin{array}{r} 59 \\ 61 \\ + 63 \\ \hline \end{array}$

Pat Patton took blocks of 4 numbers in a row from the addition table .
 Blocks of four a familiar pattern repeat,
 Not quite as simple as three, but just as neat .

166.

Take →	<table border="1"><tr><td>3</td><td>4</td><td>5</td><td>6</td></tr></table>	3	4	5	6	<table border="1"><tr><td>5</td><td>6</td><td>7</td><td>8</td></tr></table>	5	6	7	8	<table border="1"><tr><td>7</td><td>8</td><td>9</td><td>10</td></tr></table>	7	8	9	10			
3	4	5	6															
5	6	7	8															
7	8	9	10															
Sum of two center numbers	$\begin{array}{r} 4 \\ + 5 \\ \hline 9 \end{array}$	$\begin{array}{r} 6 \\ + 7 \\ \hline \end{array}$	$\begin{array}{r} 8 \\ + 9 \\ \hline \end{array}$	$\begin{array}{r} 3 \\ 4 \\ 5 \\ + 6 \\ \hline \end{array}$	$\begin{array}{r} 5 \\ 6 \\ 7 \\ + 8 \\ \hline \end{array}$	$\begin{array}{r} 7 \\ 8 \\ 9 \\ + 10 \\ \hline \end{array}$												
Multiply sum by 2	$\begin{array}{r} \times 2 \\ \hline 18 \end{array}$	$\begin{array}{r} \times 2 \\ \hline \end{array}$	$\begin{array}{r} \times 2 \\ \hline \end{array}$															

167.

Take →	<table border="1"><tr><td>9</td><td>10</td><td>11</td><td>12</td></tr></table>	9	10	11	12	<table border="1"><tr><td>14</td><td>15</td><td>16</td><td>17</td></tr></table>	14	15	16	17	<table border="1"><tr><td>15</td><td>16</td><td>17</td><td>18</td></tr></table>	15	16	17	18			
9	10	11	12															
14	15	16	17															
15	16	17	18															
Sum of two center numbers	$\begin{array}{r} 10 \\ + 11 \\ \hline \end{array}$	$\begin{array}{r} 15 \\ + 16 \\ \hline \end{array}$	$\begin{array}{r} 16 \\ + 17 \\ \hline \end{array}$	$\begin{array}{r} 9 \\ 10 \\ 11 \\ + 12 \\ \hline \end{array}$	$\begin{array}{r} 14 \\ 15 \\ 16 \\ + 17 \\ \hline \end{array}$	$\begin{array}{r} 15 \\ 16 \\ 17 \\ + 18 \\ \hline \end{array}$												
Multiply sum by 2	$\begin{array}{r} \times 2 \\ \hline \end{array}$	$\begin{array}{r} \times 2 \\ \hline \end{array}$	$\begin{array}{r} \times 2 \\ \hline \end{array}$															

168.

Now try these!

Take →	<table border="1"><tr><td>23</td><td>24</td><td>25</td><td>26</td></tr></table>	23	24	25	26	<table border="1"><tr><td>31</td><td>32</td><td>33</td><td>34</td></tr></table>	31	32	33	34	<table border="1"><tr><td>45</td><td>46</td><td>47</td><td>48</td></tr></table>	45	46	47	48			
23	24	25	26															
31	32	33	34															
45	46	47	48															
Sum of two center numbers	$\begin{array}{r} 24 \\ + 25 \\ \hline \end{array}$	$\begin{array}{r} 32 \\ + 33 \\ \hline \end{array}$	$\begin{array}{r} 46 \\ + 47 \\ \hline \end{array}$	$\begin{array}{r} 23 \\ 24 \\ 25 \\ + 26 \\ \hline \end{array}$	$\begin{array}{r} 31 \\ 32 \\ 33 \\ + 34 \\ \hline \end{array}$	$\begin{array}{r} 45 \\ 46 \\ 47 \\ + 48 \\ \hline \end{array}$												
Multiply sum by 2	$\begin{array}{r} \times 2 \\ \hline \end{array}$	$\begin{array}{r} \times 2 \\ \hline \end{array}$	$\begin{array}{r} \times 2 \\ \hline \end{array}$															

Now Seymour says once more to rows we go,
A longer pattern to study and know .

169.

Take 	Center number of block	Multiply center number by 5	Check sum					
<table border="1"><tr><td>2</td><td>3</td><td>4</td><td>5</td><td>6</td></tr></table>	2	3	4	5	6	4	$\begin{array}{r} 4 \\ \times 5 \\ \hline \end{array}$	$\begin{array}{r} 2 \\ 3 \\ 4 \\ 5 \\ + 6 \\ \hline \end{array}$
2	3	4	5	6				
<table border="1"><tr><td>9</td><td>10</td><td>11</td><td>12</td><td>13</td></tr></table>	9	10	11	12	13	11	$\begin{array}{r} 11 \\ \times 5 \\ \hline \end{array}$	$\begin{array}{r} 9 \\ 10 \\ 11 \\ 12 \\ + 13 \\ \hline \end{array}$
9	10	11	12	13				
<table border="1"><tr><td>10</td><td>11</td><td>12</td><td>13</td><td>14</td></tr></table>	10	11	12	13	14	12	$\begin{array}{r} 12 \\ \times 5 \\ \hline \end{array}$	$\begin{array}{r} 10 \\ 11 \\ 12 \\ 13 \\ + 14 \\ \hline \end{array}$
10	11	12	13	14				
<table border="1"><tr><td>15</td><td>16</td><td>17</td><td>18</td><td>19</td></tr></table>	15	16	17	18	19	17	$\begin{array}{r} 17 \\ \times 5 \\ \hline \end{array}$	$\begin{array}{r} 15 \\ 16 \\ 17 \\ 18 \\ + 19 \\ \hline \end{array}$
15	16	17	18	19				
<table border="1"><tr><td>21</td><td>22</td><td>23</td><td>24</td><td>25</td></tr></table>	21	22	23	24	25	23	$\begin{array}{r} 23 \\ \times 5 \\ \hline \end{array}$	$\begin{array}{r} 21 \\ 22 \\ 23 \\ 24 \\ + 25 \\ \hline \end{array}$
21	22	23	24	25				
<table border="1"><tr><td>33</td><td>34</td><td>35</td><td>36</td><td>37</td></tr></table>	33	34	35	36	37	35	$\begin{array}{r} 35 \\ \times 5 \\ \hline \end{array}$	$\begin{array}{r} 33 \\ 34 \\ 35 \\ 36 \\ + 37 \\ \hline \end{array}$
33	34	35	36	37				

Take a block of 5 numbers along a diagonal in the addition table .

5 numbers in a diagonal now you take ,

Here 5 times the center number, the sum will make .

170.

5 times center number	Check	5 times center number	Check	5 times center number	Check
$\begin{array}{r} 12 \\ \times 5 \\ \hline \end{array}$	$\begin{array}{r} 8 \\ 10 \\ 12 \\ 14 \\ + 16 \\ \hline \end{array}$	$\begin{array}{r} 13 \\ \times 5 \\ \hline \end{array}$	$\begin{array}{r} 9 \\ 11 \\ 13 \\ 15 \\ + 17 \\ \hline \end{array}$	$\begin{array}{r} 14 \\ \times 5 \\ \hline \end{array}$	$\begin{array}{r} 10 \\ 12 \\ 14 \\ 16 \\ + 18 \\ \hline \end{array}$

171.

Try these.

5 times center number	Check	5 times center number	Check	5 times center number	Check
$\begin{array}{r} 26 \\ \times 5 \\ \hline \end{array}$	$\begin{array}{r} 22 \\ 24 \\ 26 \\ 28 \\ + 30 \\ \hline \end{array}$	$\begin{array}{r} 38 \\ \times 5 \\ \hline \end{array}$	$\begin{array}{r} 34 \\ 36 \\ 38 \\ 40 \\ + 42 \\ \hline \end{array}$	$\begin{array}{r} 52 \\ \times 5 \\ \hline \end{array}$	$\begin{array}{r} 48 \\ 50 \\ 52 \\ 54 \\ + 56 \\ \hline \end{array}$

3.2 ADDITION TABLE - 2 BY 2 SQUARES

To find the sum in a 2 by 2 square,
Take smallest then add 1, times 4 and there!

172.

	Take →	<table border="1"><tr><td>2</td><td>3</td></tr><tr><td>3</td><td>4</td></tr></table>	2	3	3	4	<table border="1"><tr><td>5</td><td>6</td></tr><tr><td>6</td><td>7</td></tr></table>	5	6	6	7	<table border="1"><tr><td>7</td><td>8</td></tr><tr><td>8</td><td>9</td></tr></table>	7	8	8	9	<table border="1"><tr><td>9</td><td>10</td></tr><tr><td>10</td><td>11</td></tr></table>	9	10	10	11

3.3 ADDITION TABLE - CROSS AND DIAGONAL PATTERNS

From the addition table:

If five numbers in a cross pattern you take,
Five times the center number, the sum will make.

186.	5 times center number	Check
$\begin{array}{c} 1 \\ \\ 1 \text{ } \textcircled{2} \text{ } 3 \\ \\ 3 \end{array}$	$\begin{array}{r} 2 \\ \times 5 \\ \hline 10 \end{array}$	$\begin{array}{r} 1 \\ 1 \\ 2 \\ 3 \\ + 3 \\ \hline 10 \end{array}$
$\begin{array}{c} 3 \\ \\ 3 \text{ } \textcircled{4} \text{ } 5 \\ \\ 5 \end{array}$	$\begin{array}{r} 4 \\ \times 5 \\ \hline \end{array}$	$\begin{array}{r} 3 \\ 3 \\ 4 \\ 5 \\ + 5 \\ \hline \end{array}$
$\begin{array}{c} 5 \\ \\ 5 \text{ } \textcircled{6} \text{ } 7 \\ \\ 7 \end{array}$	$\begin{array}{r} 6 \\ \times 5 \\ \hline \end{array}$	$\begin{array}{r} 5 \\ 5 \\ 6 \\ 7 \\ + 7 \\ \hline \end{array}$
$\begin{array}{c} 8 \\ \\ 8 \text{ } \textcircled{9} \text{ } 10 \\ \\ 10 \end{array}$	$\begin{array}{r} 9 \\ \times 5 \\ \hline \end{array}$	$\begin{array}{r} 8 \\ 8 \\ 9 \\ 10 \\ + 10 \\ \hline \end{array}$
$\begin{array}{c} 10 \\ \\ 10 \text{ } \textcircled{11} \text{ } 12 \\ \\ 12 \end{array}$	$\begin{array}{r} 11 \\ \times 5 \\ \hline \end{array}$	$\begin{array}{r} 10 \\ 10 \\ 11 \\ 12 \\ + 12 \\ \hline \end{array}$
$\begin{array}{c} 11 \\ \\ 11 \text{ } \textcircled{12} \text{ } 13 \\ \\ 13 \end{array}$	$\begin{array}{r} 12 \\ \times 5 \\ \hline \end{array}$	$\begin{array}{r} 11 \\ 11 \\ 12 \\ 13 \\ + 13 \\ \hline \end{array}$

187.	5 times center number	Check
$\begin{array}{c} 13 \\ \\ 13 \text{ } \textcircled{14} \text{ } 15 \\ \\ 15 \end{array}$	$\begin{array}{r} 14 \\ \times 5 \\ \hline \end{array}$	$\begin{array}{r} 13 \\ 13 \\ 14 \\ 15 \\ + 15 \\ \hline \end{array}$
$\begin{array}{c} 15 \\ \\ 15 \text{ } \textcircled{16} \text{ } 17 \\ \\ 17 \end{array}$	$\begin{array}{r} 16 \\ \times 5 \\ \hline \end{array}$	$\begin{array}{r} 15 \\ 15 \\ 16 \\ 17 \\ + 17 \\ \hline \end{array}$
$\begin{array}{c} 18 \\ \\ 18 \text{ } \textcircled{19} \text{ } 20 \\ \\ 20 \end{array}$	$\begin{array}{r} 19 \\ \times 5 \\ \hline \end{array}$	$\begin{array}{r} 18 \\ 18 \\ 19 \\ 20 \\ + 20 \\ \hline \end{array}$
$\begin{array}{c} 25 \\ \\ 25 \text{ } \textcircled{26} \text{ } 27 \\ \\ 27 \end{array}$	$\begin{array}{r} 26 \\ \times 5 \\ \hline \end{array}$	$\begin{array}{r} 25 \\ 25 \\ 26 \\ 27 \\ + 27 \\ \hline \end{array}$
$\begin{array}{c} 32 \\ \\ 32 \text{ } \textcircled{33} \text{ } 34 \\ \\ 34 \end{array}$	$\begin{array}{r} 33 \\ \times 5 \\ \hline \end{array}$	$\begin{array}{r} 32 \\ 32 \\ 33 \\ 34 \\ + 34 \\ \hline \end{array}$
$\begin{array}{c} 47 \\ \\ 47 \text{ } \textcircled{48} \text{ } 49 \\ \\ 49 \end{array}$	$\begin{array}{r} 48 \\ \times 5 \\ \hline \end{array}$	$\begin{array}{r} 47 \\ 47 \\ 48 \\ 49 \\ + 49 \\ \hline \end{array}$

If the sum of a cross pattern you divide by five,
The center number you get, then the cross you derive .

188.

Sum 15 $\begin{array}{r} 3 \\ 5 \overline{) 15} \\ \underline{15} \\ 0 \end{array}$
Sum 25 $5 \overline{) 25}$
Sum 35 $5 \overline{) 35}$
Sum 65 $5 \overline{) 65}$
Sum 75 $5 \overline{) 75}$
Sum 85 $5 \overline{) 85}$

189.

Sum 90 $5 \overline{) 90}$
Sum 110 $5 \overline{) 110}$
Sum 120 $5 \overline{) 120}$
Sum 135 $5 \overline{) 135}$
Sum 155 $5 \overline{) 155}$
Sum 210 $5 \overline{) 210}$

From the addition table :

If five numbers on crossed diagonals you take,
Then five times the center number, the sum will make .

54		56		58
55		57		59
56		58		60

$$\begin{array}{r} 57 \\ \times 9 \\ \hline \end{array}$$

65		67		69
66		68		70
67		69		71

$$\begin{array}{r} 68 \\ \times 9 \\ \hline \end{array}$$

In the addition table : If rows between numbers nine you omit ,
Take 9 times the center, the sum you'll hit .

197.

0	1	2
2	3	4
4	5	6

9 times
center number

$$\begin{array}{r} 3 \\ \times 9 \\ \hline \end{array}$$

198.

11	12	13
13	14	15
15	16	17

9 times
center number

$$\begin{array}{r} 14 \\ \times 9 \\ \hline \end{array}$$

199.

12	13	14
14	15	16
16	17	18

9 times
center number

$$\begin{array}{r} 15 \\ \times 9 \\ \hline \end{array}$$

In the addition table : If both rows and columns between numbers nine you drop,
Take 9 times the center, and up the sum will pop !

200.

1	3	5
3	5	7
5	7	9

9 times
center number

$$\begin{array}{r} 5 \\ \times 9 \\ \hline \end{array}$$

201.

5	7	9
7	9	11
9	11	13

9 times
center number

$$\begin{array}{r} 9 \\ \times 9 \\ \hline \end{array}$$

202.

8	10	12
10	12	14
12	14	16

9 times
center number

$$\begin{array}{r} 12 \\ \times 9 \\ \hline \end{array}$$

203.

10	12	14
12	14	16
14	16	18

9 times
center number

$$\begin{array}{r} 14 \\ \times 9 \\ \hline \end{array}$$

In the addition table :

If nine numbers in a diamond shape you take,
9 times the center number, the sum will make.

204.

$$\begin{array}{r} 9 \text{ times} \\ \text{center number:} \end{array} \quad \begin{array}{r} 4 \\ \times 9 \\ \hline \end{array}$$

205.

$$\begin{array}{r} 5 \\ \times 9 \\ \hline \end{array}$$

206.

$$\begin{array}{r} 8 \\ \times 9 \\ \hline \end{array}$$

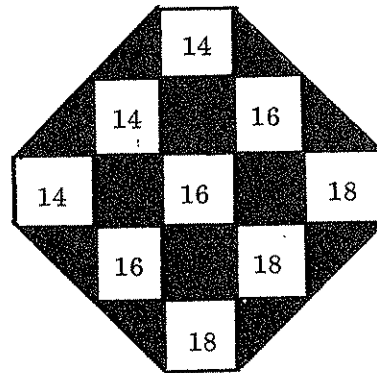

207.

$$\begin{array}{r} 9 \text{ times} \\ \text{center number:} \end{array} \quad \begin{array}{r} 11 \\ \times 9 \\ \hline \end{array}$$

208.

$$\begin{array}{r} 16 \\ \times 9 \\ \hline \end{array}$$

209.

$$\begin{array}{r} 9 \text{ times} \\ \text{center number:} \end{array} \quad \begin{array}{r} 28 \\ \times 9 \\ \hline \end{array}$$

210.

$$\begin{array}{r} 37 \\ \times 9 \\ \hline \end{array}$$

211.

$$\begin{array}{r} 49 \\ \times 9 \\ \hline \end{array}$$

3.5 ADDITION TABLE - GRAND SUMS

" The sum of all the numbers in an addition table",
 says Seymour Patton,
 " you can find quickly if you use this simple pattern. "

C
O
L
U
M
N

+	0
0	0

SQUARE	Number of numbers in the square	1
0 to 0	Times largest number in the column	$\times 0$
	Sum of numbers in the square	0

C
O
L
U
M
N

+	0	1
0	0	1
1	1	2

SQUARE	Number of numbers in the square	4
0 to 1	Times largest number in the column	$\times 1$
	Sum of numbers in the square	4

C
O
L
U
M
N

+	0	1	2
0	0	1	2
1	1	2	3
2	2	3	4

SQUARE	Number of numbers in the square	9
0 to 2	Times largest number in the column	$\times 2$
	Sum of numbers in the square	18

212. Fill in the chart. Follow the example in the first row. Use addition table, page 33.

SQUARE	Number of numbers in the square	Largest number in the column	Product gives sum of the numbers in the square
0 to 3	16	3	$16 \times 3 = 48$
0 to 4			
0 to 5			
0 to 6			
0 to 7			
0 to 8			
0 to 9			

3.6 ADDITION TABLE - SOME PRODUCTS

Add along the diagonals with close attention,
Sums you'll find can be written as multiplication.

Addition table : 0 to 3

+	0	1	2	3
0	0	1	2	3
1	1	2	3	4
2	2	3	4	5
3	3	4	5	6

Example

$$3 = 3 = 1 \times 3$$

$$2 + 4 = 6 = 2 \times 3$$

$$1 + 3 + 5 = 9 = 3 \times 3$$

$$0 + 2 + 4 + 6 = 12 = 4 \times 3$$

213.

Addition table : 0 to 4

+	0	1	2	3	4
0	0	1	2	3	4
1	1	2	3	4	5
2	2	3	4	5	6
3	3	4	5	6	7
4	4	5	6	7	8

Fill in the blanks.

$$4 = 4 = 1 \times 4$$

$$3 + 5 = \underline{\quad} = \underline{\quad}$$

$$2 + 4 + 6 = \underline{\quad} = \underline{\quad}$$

$$1 + 3 + 5 + 7 = \underline{\quad} = \underline{\quad}$$

$$0 + 2 + 4 + 6 + 8 = \underline{\quad} = \underline{\quad}$$

214.

Addition table : 0 to 5

+	0	1	2	3	4	5
0	0	1	2	3	4	5
1	1	2	3	4	5	6
2	2	3	4	5	6	7
3	3	4	5	6	7	8
4	4	5	6	7	8	9
5	5	6	7	8	9	10

Fill in the blanks.

$$5 = 5 = 1 \times 5$$

$$4 + 6 = \underline{\quad} = \underline{\quad}$$

$$3 + 5 + 7 = \underline{\quad} = \underline{\quad}$$

$$2 + 4 + 6 + 8 = \underline{\quad} = \underline{\quad}$$

$$1 + 3 + 5 + 7 + 9 = \underline{\quad} = \underline{\quad}$$

$$0 + 2 + 4 + 6 + 8 + 10 = \underline{\quad} = \underline{\quad}$$

3.7 MULTIPLICATION TABLE - ROW PATTERNS

Now the multiplication table its mysteries will show,
Some patterns old, some patterns new, but all are fun to know.

Emma Times made up a multiplication table. She showed it to her father, Noah Times.

MULTIPLICATION TABLE

x	0	1	2	3	4	5	6	7	8	9
0	0	0	0	0	0	0	0	0	0	0
1	0	1	2	3	4	5	6	7	8	9
2	0	2	4	6	8	10	12	14	16	18
3	0	3	6	9	12	15	18	21	24	27
4	0	4	8	12	16	20	24	28	32	36
5	0	5	10	15	20	25	30	35	40	45
6	0	6	12	18	24	30	36	42	48	54
7	0	7	14	21	28	35	42	49	56	63
8	0	8	16	24	32	40	48	56	64	72
9	0	9	18	27	36	45	54	63	72	81

Emma Times tried some of Seymour Patton's patterns .

First to rows we go and here we simply show,
That patterns in addition, for products hold .

Take a block of 3 numbers in a row from the table	<table border="1" style="margin: auto;"> <tr> <td style="padding: 2px 10px;">3</td> <td style="padding: 2px 10px;">4</td> <td style="padding: 2px 10px;">5</td> </tr> </table>	3	4	5
3	4	5		
Take the center number of the block	4			
Multiply the center number by 3	$4 \times 3 = 12$			
Emma found that 12 is the sum of the 3 numbers in the block .				

Take a block of 3 numbers in a row from the multiplication table .

If the center number you multiply by 3

The sum of the numbers you'll get quickly.

Try these.

Try these.

215. 3 times Check
center number

216. 3 times Check
center number

6	7	8
---	---	---

7	6
x 3	+ 7
21	+ 8
21	21

72	84	96

3.8 MULTIPLICATION TABLE - 2 BY 2 SQUARES

Take a 2 by 2 square of numbers from the multiplication table .

		Columns	
	x	(4)	(5)
Rows	(2)	8	10
	(3)	12	15

$$\begin{array}{r} \text{Sum of column numbers} \\ 4 \\ + 5 \\ \hline 9 \end{array}$$

$$\begin{array}{r} \text{Sum of row numbers} \\ 2 \\ + 3 \\ \hline 5 \end{array}$$

$$\begin{array}{r} \text{Product of the sums} \\ 9 \\ \times 5 \\ \hline 45 \end{array}$$

45 is the sum of all the numbers in the square .

Emma Times thus spoke to Noah Times:

" The sum of the numbers of the columns,
Times the sum of the numbers of the rows,
The sum of all the numbers in the square shows . "

221.

		Columns	
	x	(5)	(6)
Rows	(4)	20	24
	(5)	25	30

Sum of column numbers	Sum of row numbers	Product of sums	Check
$\begin{array}{r} 5 \\ + 6 \\ \hline \end{array}$	$\begin{array}{r} 4 \\ + 5 \\ \hline \end{array}$		$\begin{array}{r} 20 \\ 24 \\ 25 \\ + 30 \\ \hline \end{array}$

222.

CHAPTER 4

WONDER - FULL WORLD OF NUMBERS

4.1 ENCHANTING NATURAL NUMBERS

With zero you begin, the first natural number.
 To zero add one, this is easy to remember.
 Then if the pattern you should follow repeatedly,
 The natural numbers you will form endlessly .

Add 1 to 0
 Add 1 to 1
 Add 1 to 2
 .
 .
 .

Begin	0		
	0	+	1 = 1
	1	+	1 = 2
	2	+	1 = 3
			⋮
	over	and	over
	forevermore		

1st natural number
 2nd natural number
 3rd natural number
 4th natural number
 .
 .
 .

Write the next five natural numbers after 3 .

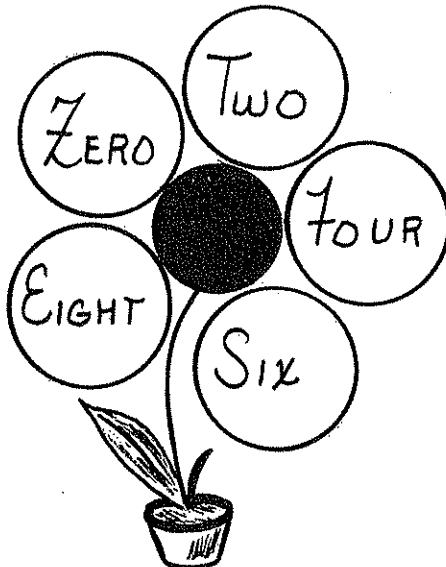

236.

0, 1, 2, 3, _____, _____, _____, _____, _____, . . .
--

If you wish the natural numbers other names to call,
 Use WHOLE or COUNTING, but NATURAL is the best of all .

4.2 THE CHARM OF EVEN NUMBERS

E. Van Stephen the even numbers could easily locate,
 For even numbers always end in 0, 2, 4, 6, 8 .

237. Circle the even numbers

16	20	23	28
35	44	57	62
71	80	94	105
116	129	182	246
1012	2345	3018	4636
5143	6868	7071	8000

DIVISION

E. Van Stephen some even numbers did divide by 2 ,
He saw a simple pattern, it will soon be clear to you .

$$\begin{array}{r} 6 \\ 2 \overline{) 12} \\ \underline{12} \\ 0 \end{array} \text{ remainder}$$

remainder is 0

238.

Find the quotient and remainder.

$2 \overline{) 16}$	$2 \overline{) 20}$	$2 \overline{) 36}$	$2 \overline{) 44}$	$2 \overline{) 58}$
remainder is _____	remainder is _____	remainder is _____	remainder is _____	remainder is _____
An even number when divided by 2 will always leave a remainder _____ .				

ADDITION

Add even natural numbers and the sum will always be -- ,
Try it with E. Van Stephen and you no doubt will see .

$$\begin{array}{r} 24 \\ + 68 \\ \hline 92 \end{array}$$

sum is even

239.

$\begin{array}{r} 38 \\ + 76 \\ \hline \end{array}$ sum is _____	$\begin{array}{r} 42 \\ + 86 \\ \hline \end{array}$ sum is _____	$\begin{array}{r} 68 \\ + 94 \\ \hline \end{array}$ sum is _____	$\begin{array}{r} 150 \\ + 66 \\ \hline \end{array}$ sum is _____	$\begin{array}{r} 236 \\ + 148 \\ \hline \end{array}$ sum is _____
$\begin{array}{r} 24 \\ 38 \\ + 26 \\ \hline \end{array}$ sum is _____	$\begin{array}{r} 48 \\ 52 \\ + 66 \\ \hline \end{array}$ sum is _____	$\begin{array}{r} 80 \\ 78 \\ + 46 \\ \hline \end{array}$ sum is _____		
$\begin{array}{r} 132 \\ 78 \\ + 86 \\ \hline \end{array}$ sum is _____	$\begin{array}{r} 202 \\ 46 \\ + 426 \\ \hline \end{array}$ sum is _____	$\begin{array}{r} 362 \\ 458 \\ + 68 \\ \hline \end{array}$ sum is _____	$\begin{array}{r} 416 \\ 528 \\ + 660 \\ \hline \end{array}$ sum is _____	$\begin{array}{r} 512 \\ 648 \\ + 846 \\ \hline \end{array}$ sum is _____

240. The sum of even natural numbers is always an _____ natural number .

MULTIPLICATION

If even natural numbers you should multiply
The pattern you will quickly see - now just you try .

$$\begin{array}{r} 12 \\ \times 4 \\ \hline 48 \end{array}$$

product is even

241. Find the products.

$\begin{array}{r} 14 \\ \times 6 \\ \hline \end{array}$	$\begin{array}{r} 36 \\ \times 8 \\ \hline \end{array}$	$\begin{array}{r} 48 \\ \times 4 \\ \hline \end{array}$	$\begin{array}{r} 56 \\ \times 2 \\ \hline \end{array}$	$\begin{array}{r} 78 \\ \times 6 \\ \hline \end{array}$
$\begin{array}{r} 146 \\ \times 4 \\ \hline \end{array}$	$\begin{array}{r} 234 \\ \times 6 \\ \hline \end{array}$	$\begin{array}{r} 382 \\ \times 8 \\ \hline \end{array}$	$\begin{array}{r} 458 \\ \times 2 \\ \hline \end{array}$	$\begin{array}{r} 524 \\ \times 0 \\ \hline \end{array}$
The product of even natural numbers is always an _____ natural number .				

SUBTRACTION

If subtraction of even numbers you should see,
The difference will hold for you no mystery .

$$\begin{array}{r} 36 \\ - 24 \\ \hline 12 \end{array}$$

difference is even

242.

$\begin{array}{r} 56 \\ - 22 \\ \hline \end{array}$	$\begin{array}{r} 78 \\ - 64 \\ \hline \end{array}$	$\begin{array}{r} 86 \\ - 40 \\ \hline \end{array}$	$\begin{array}{r} 94 \\ - 38 \\ \hline \end{array}$	$\begin{array}{r} 96 \\ - 56 \\ \hline \end{array}$
$\begin{array}{r} 124 \\ - 42 \\ \hline \end{array}$	$\begin{array}{r} 236 \\ - 58 \\ \hline \end{array}$	$\begin{array}{r} 352 \\ - 64 \\ \hline \end{array}$	$\begin{array}{r} 450 \\ - 76 \\ \hline \end{array}$	$\begin{array}{r} 532 \\ - 532 \\ \hline \end{array}$
The difference of two even natural numbers is always an _____ natural number.				

4.3 SUMS OF EVEN NATURAL NUMBERS

Adding even natural numbers in a row,
Is quite simple as this pattern now will show.

243.

Fill in the boxes . Fill in the circles.

Number of
numbers in
the sum

SUMS

- 1 $2 = (1 \times 1) + 1 = \textcircled{2}$
- 2 $2 + 4 = (2 \times 2) + 2 = \textcircled{6}$
- 3 $2 + 4 + 6 = (3 \times 3) + 3 = \textcircled{12}$
- 4 $2 + 4 + 6 + 8 = \boxed{} = \textcircled{}$
- 5 $2 + 4 + 6 + 8 + 10 = \boxed{} = \textcircled{}$
- 6 $2 + 4 + 6 + 8 + 10 + 12 = \boxed{} = \textcircled{}$
- 7 $2 + 4 + 6 + 8 + 10 + 12 + 14 = \boxed{} = \textcircled{}$
- 8 $2 + 4 + 6 + 8 + 10 + 12 + 14 + 16 = \boxed{} = \textcircled{}$
- 9 $2 + 4 + 6 + 8 + 10 + 12 + 14 + 16 + 18 = \boxed{} = \textcircled{}$
- 10 $2 + 4 + 6 + 8 + 10 + 12 + 14 + 16 + 18 + 20 = \boxed{} = \textcircled{}$
- 11 $2 + 4 + 6 + 8 + 10 + 12 + 14 + 16 + 18 + 20 + 22 = \boxed{} = \textcircled{}$
- 12 $2 + 4 + 6 + 8 + 10 + 12 + 14 + 16 + 18 + 20 + 22 + 24 = \boxed{} = \textcircled{}$
- 13 $2 + 4 + 6 + 8 + 10 + 12 + 14 + 16 + 18 + 20 + 22 + 24 + 26 = \boxed{} = \textcircled{}$

4.4 THE SPELL OF ODD NUMBERS

Numbers odd for Justin Todd cast a spell divine,
For they did always end in 1, 3, 5, 7, 9.

244. Circle the odd numbers.

13	21	26	35
46	57	79	83
99	101	230	287
343	358	475	484
1013	2001	3577	4630

DIVISION

If a number odd you should divide by 2,
A zero remainder should never be left for you.

$$\begin{array}{r} 5 \\ 2 \overline{) 11} \\ \underline{10} \\ 1 \text{ remainder} \end{array}$$

remainder is 1

245.

$2 \overline{) 15}$	$2 \overline{) 17}$	$2 \overline{) 23}$	$2 \overline{) 31}$	$2 \overline{) 49}$
remainder is ____	remainder is ____	remainder is ____	remainder is ____	remainder is ____
An odd number when divided by 2 will always leave a remainder ____.				

ADDITION

With sums of odd numbers you must use care,
For some are even and others odd - so beware!

$$\begin{array}{r} 7 \\ + 5 \\ \hline 12 \end{array}$$

sum is even

246.

$\begin{array}{r} 13 \\ + 7 \\ \hline \end{array}$	$\begin{array}{r} 21 \\ + 9 \\ \hline \end{array}$	$\begin{array}{r} 25 \\ + 17 \\ \hline \end{array}$	$\begin{array}{r} 27 \\ + 39 \\ \hline \end{array}$	$\begin{array}{r} 49 \\ + 55 \\ \hline \end{array}$
--	--	---	---	---

247.

$$\begin{array}{r} 131 \\ 83 \\ + 95 \\ \hline \end{array}$$

$$\begin{array}{r} 207 \\ 53 \\ + 429 \\ \hline \end{array}$$

$$\begin{array}{r} 363 \\ 451 \\ + 67 \\ \hline \end{array}$$

$$\begin{array}{r} 427 \\ 519 \\ + 663 \\ \hline \end{array}$$

$$\begin{array}{r} 529 \\ 641 \\ + 799 \\ \hline \end{array}$$

248. The sum of 2, 4, 6, 8, . . . odd numbers is always an _____ number .

249. The sum of 3, 5, 7, 9, . . . odd numbers is always an _____ number .

MULTIPLICATION

Products of two natural numbers odd,
Had no deep mystery for Justin Todd .

250.

9
x 7
63
product is odd

251. The product of odd natural numbers is always an _____ natural number .

SUBTRACTION

If subtraction of odd numbers you do ,
A little surprise is in store for you .

$\begin{array}{r} 17 \\ - 3 \\ \hline 14 \end{array}$ difference is even
--

252.

$\begin{array}{r} 35 \\ - 7 \\ \hline \end{array}$	$\begin{array}{r} 47 \\ - 13 \\ \hline \end{array}$	$\begin{array}{r} 51 \\ - 25 \\ \hline \end{array}$	$\begin{array}{r} 67 \\ - 39 \\ \hline \end{array}$	$\begin{array}{r} 93 \\ - 85 \\ \hline \end{array}$
$\begin{array}{r} 113 \\ - 25 \\ \hline \end{array}$	$\begin{array}{r} 235 \\ - 45 \\ \hline \end{array}$	$\begin{array}{r} 361 \\ - 77 \\ \hline \end{array}$	$\begin{array}{r} 459 \\ - 81 \\ \hline \end{array}$	$\begin{array}{r} 789 \\ - 789 \\ \hline \end{array}$
The difference of two odd natural numbers is always an _____ natural number .				

SUMMARY

We now end with a summary,
That for you will quite useful be .

Fill in the charts .

253.

4.6 PRIME NUMBERS AND SUMS

If with Peppy Prime the prime numbers you would list :

0 and 1 you must leave out. Now those natural numbers take,
Divisible exactly only by 1 and the number itself .

2	3	5	7	11	13	17
19	23	29	31	37	41	43
47	53	59	61	67	71	73
79	83	89	97	101	103	107
109	113	127	131	137	139	149
151	157	163	167	173	179	181
.

Natural numbers not 0, 1, or prime are composite natural numbers .

Peppy Prime a mystery would solve : Can every even natural number greater than 2,
Be written as the sum of primes TWO ?

257. Fill in the chart.

Even number	Sum of 2 primes
4	= 2 + 2
8	= 3 + 5
10	=
12	=
14	=
16	=
18	=
20	=
22	=
24	=
26	=

258. Fill in the chart.

4.7 NUMBERS AS SUMS OF CONSECUTIVE NUMBERS

A block of 2 or more numbers in a row you must take,
Now sum them all - the total must the given number make.

0	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17
---	---	---	---	---	---	---	---	---	---	----	----	----	----	----	----	----	----

Given number 1 3 5 6 7 9 9

270.

Given number

271.

Given number

272.

Use the block of numbers in a row on page 70.

Given number
273.

	23	29	24	48	22	26	34
+	$\begin{array}{ c c } \hline \square \\ \hline \square \\ \hline \end{array}$	$\begin{array}{ c c } \hline \square \\ \hline \square \\ \hline \end{array}$	$\begin{array}{ c c } \hline \square \\ \hline \square \\ \hline \square \\ \hline \end{array}$	$\begin{array}{ c c } \hline \square \\ \hline \square \\ \hline \square \\ \hline \end{array}$	$\begin{array}{ c c } \hline \square \\ \hline \square \\ \hline \square \\ \hline \square \\ \hline \end{array}$	$\begin{array}{ c c } \hline \square \\ \hline \square \\ \hline \square \\ \hline \square \\ \hline \end{array}$	$\begin{array}{ c c } \hline \square \\ \hline \square \\ \hline \square \\ \hline \square \\ \hline \end{array}$

Given number
274.

	38	46	20	40	25	25
+	$\begin{array}{ c c } \hline \square \\ \hline \square \\ \hline \square \\ \hline \square \\ \hline \end{array}$	$\begin{array}{ c c } \hline \square \\ \hline \square \\ \hline \square \\ \hline \square \\ \hline \end{array}$	$\begin{array}{ c c } \hline \square \\ \hline \square \\ \hline \square \\ \hline \square \\ \hline \square \\ \hline \end{array}$	$\begin{array}{ c c } \hline \square \\ \hline \square \\ \hline \square \\ \hline \square \\ \hline \square \\ \hline \end{array}$	$\begin{array}{ c c } \hline \square \\ \hline \square \\ \hline \square \\ \hline \square \\ \hline \square \\ \hline \end{array}$	$\begin{array}{ c c } \hline \square \\ \hline \square \\ \hline \end{array}$

Given number
275.

	21	21	21	30	30	30	50	50	
+	$\begin{array}{ c c } \hline \square \\ \hline \square \\ \hline \square \\ \hline \square \\ \hline \square \\ \hline \end{array}$	$\begin{array}{ c c } \hline \square \\ \hline \square \\ \hline \square \\ \hline \end{array}$	$\begin{array}{ c c } \hline \square \\ \hline \square \\ \hline \end{array}$	$\begin{array}{ c c } \hline \square \\ \hline \square \\ \hline \square \\ \hline \square \\ \hline \square \\ \hline \end{array}$	$\begin{array}{ c c } \hline \square \\ \hline \square \\ \hline \square \\ \hline \square \\ \hline \end{array}$	$\begin{array}{ c c } \hline \square \\ \hline \square \\ \hline \square \\ \hline \end{array}$	$\begin{array}{ c c } \hline \square \\ \hline \square \\ \hline \square \\ \hline \square \\ \hline \end{array}$	$\begin{array}{ c c } \hline \square \\ \hline \square \\ \hline \square \\ \hline \square \\ \hline \square \\ \hline \end{array}$	$\begin{array}{ c c } \hline \square \\ \hline \square \\ \hline \square \\ \hline \square \\ \hline \end{array}$

4.8 PERMUTATIONS

In copying numbers without attention,
See what can happen to Perm U. Tashun .

1 2
can be copied as
1 2
or 2 1
2 ways

276.
1 2 3
can be copied as
1 2 3 _____
1 3 2 _____

_____ ways

277.
1 2 3 4
can be copied as
1 2 3 4 _____
1 2 4 3 _____

_____ ways

Pete Repeat , Perm U. Tashun's constant friend did see,
From digits 2, 3 or more, many numbers there could be .

How many different 2-digit numbers can you write using the digits 1, 2 ?

Solution

1 1 1 2 2 1 2 2

278. How many different 3-digit numbers can you write using the digits 1, 2, 3 ?

1 1 1 _____
1 1 2 _____

For M. T. Kashbox making change was no fun ,
 So from Lotta Koins he learned how it was done .

With Lotta Koins, help M. T. Kashbox make change for a

279.

Use	QUARTER					
NICKEL	5					
PENNY	0					

280.

Use	QUARTER		
DIME	2		
NICKEL	1		

281.

Use	QUARTER											
DIME	2											
NICKEL	1											
PENNY	0											

282. Use

HALF DOLLAR

DIME	5					
NICKEL	0					

283. Use

HALF DOLLAR

QUARTER	2									
DIME	0									
NICKEL	0									

Now at most 4 pennies, 1 nickel, 2 dimes, 1 quarter, 1 half dollar you may take, To show M. T. Kashbox how for purchased toys the change you would make .

284.

CHANGE

You give	Cost of toy	PENNY	NICKEL	DIME	QUARTER	HALF DOLLAR
Quarter	8 ¢	say: 9 ¢, 10 ¢ (2 pennies)	15 ¢ (1 nickel)	25 ¢ (1 dime)		
Quarter	13 ¢	say:				
Half dollar	18 ¢	say:				
Half dollar	31 ¢	say:				
Dollar	28 ¢	say:				
Dollar	33 ¢	say:				
Dollar	19 ¢	say:				
Dollar	59 ¢	say:				

4.9 FIGURATE NUMBERS

TRIANGULAR NUMBERS

Triangular numbers from triangles do come,
If you wish to know them just find the sum.

285.

added
to above

Write the first 6 pentagonal numbers.

<u>1</u>	<u>5</u>	_____
_____	_____	_____

288.

HEXAGONAL NUMBERS

Hexagons from hexagons a pretty pattern do show,
Take the sum as they grow, hexagonal numbers you'll know.

	<u>Sum</u>	<u>Hexagonal numbers</u>
1 hexagon	1	1
5 hexagons added to above	6	6

_____ hexagons added to above _____

_____ hexagons added to above _____

Write the first 6 hexagonal numbers

<u>1</u>	<u>6</u>	_____
_____	_____	_____

CHAPTER 5

ROYAL AND OTHER ROADS

5.1 TRIANGLES AND SETH SIDE

From lengths 3, a triangle to be or not to be,
Must have lengths related properly as you will see.

Seth Side says to Annie Angle: use very narrow strips of paper

or very narrow sticks

Cut them to the lengths given in each problem. Make a triangle if you can. Show it.

Sides: 2 inches
2 inches
2 inches

289.

Sides: 2 inches

Sides : 1 inch
1 $\frac{1}{2}$ inches
2 inches

Sides : 3 inches
4 inches
5 inches

A Greek mathematician, by name Pythagoras,
Some very interesting triangles left for us .

297. Complete the triangle .

If A, B, C, the lengths of the sides be
Then a triangle you see

298. If $A + B > C$, $B + C > \underline{\hspace{2cm}}$, $C + A > \underline{\hspace{2cm}}$.

5.2 CIRCLES AND CHORDS

If ends of a line segment on a circle be,
A line segment we call a CHORD you do see.

Chester Cord
says:

If points on a circle by chords you unite,
A pattern you'll find if your counting is right.

299.

Draw chords	Number of lines from each point	times	Number of points		Divide by 2 to get chords
	1	x	2	= 2	$2 \div 2 = 1$
	2	x	3	= 6	$6 \div 2 = 3$
	3	x	4	= 12	$12 \div 2 = 6$

If now to page 75 you turn then you will see,
Triangular numbers solve the 'number of chords' mystery.

5.3 LINES OF SYMMETRY

Sym Etree did say : A line across a polygon will be a **LINE OF SYMMETRY**,
If a fold across the line makes both parts match perfectly .

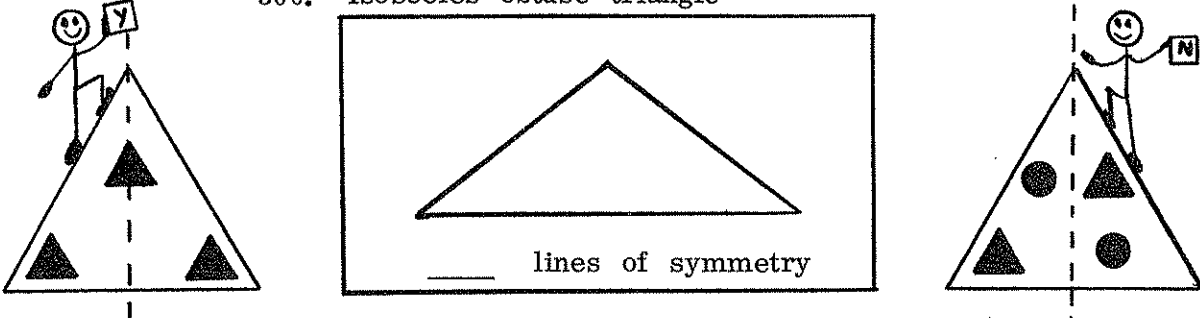

Isosceles acute triangle

Fold along the dotted line. Both parts match perfectly .
AC is a line of symmetry.
1 line of symmetry .

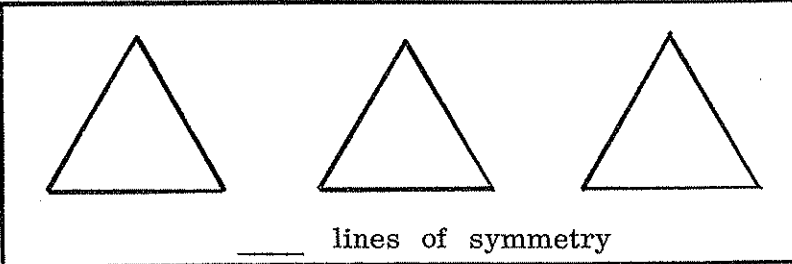

Draw lines of symmetry . If there are no lines of symmetry, write NONE .

300. Isosceles obtuse triangle

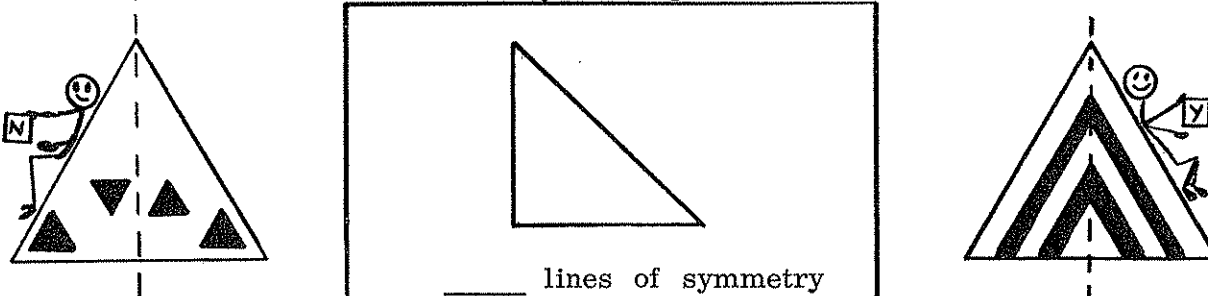

___ lines of symmetry

301. Equilateral triangle

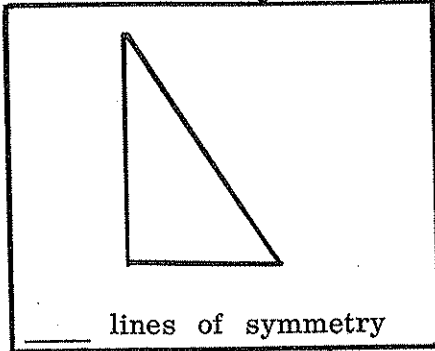

___ lines of symmetry

302. Isosceles right triangle

___ lines of symmetry

303. Scalene right triangle

304. Scalene acute triangle

305. Scalene obtuse triangle

306. Parallelogram

307. Non-isosceles trapezoid

308. General quadrilateral

309. Isosceles trapezoid

5.4 POLYGONS BACK IN PLACE

Sym Etree did see :

Putting polygons back in place,

Can be done in one or more ways.

In how many ways can you put the triangle back in the white space ? Show the ways using the lettering of the triangle . You may rotate and flip the triangle .

Isosceles acute triangle

<p>Answer</p> <table style="width: 100%;"> <tr> <td style="text-align: center;"> </td> <td style="text-align: center;"> </td> </tr> <tr> <td colspan="2" style="text-align: center;"> <p><u> 2 </u> ways</p> </td> </tr> </table>				<p><u> 2 </u> ways</p>	
<p><u> 2 </u> ways</p>					

317. Scalene acute triangle

<p>Answer</p> <div style="text-align: center;"> <p><u> </u> ways</p> </div>	

318. Scalene obtuse triangle

<p>Answer</p> <div style="text-align: center;"> <p><u> </u> ways</p> </div>	

319. Scalene right triangle

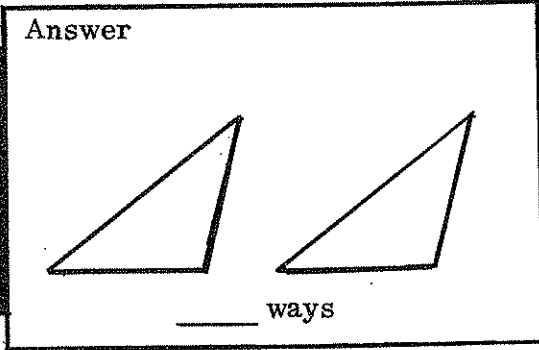

320. Non-isosceles trapezoid

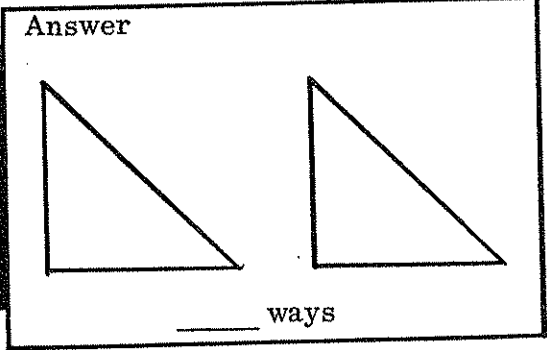

321. General quadrilateral

322. Isosceles obtuse triangle

323. Isosceles right triangle

324. Isosceles trapezoid

325. Parallelogram

Answer

___ ways

326. Rhombus

Answer

___ ways

5.5 POINTS AND TRIANGLES IN POLYGONS

Said Tiny Tangle to Polly Gone: Join points to vertices and to each other, A line segment must never cross another, Triangles form and then count their number.

333.

5.6 J. WALKER RUNS INTO B. PASCAL

From S to F, Jay Walker to the RIGHT and DOWN could go,
Or DOWN and to the RIGHT, but all other paths were a NO.

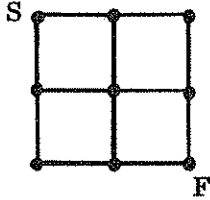

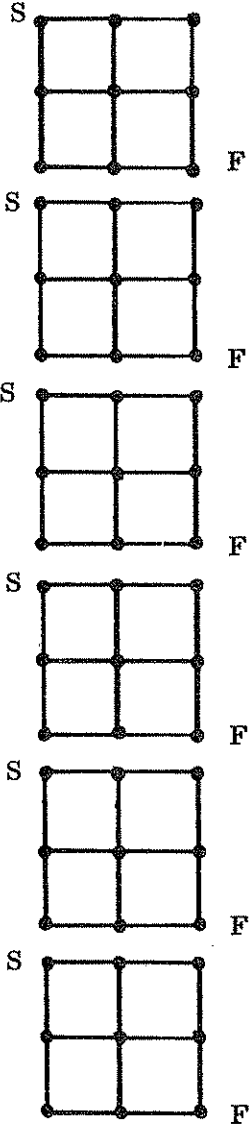

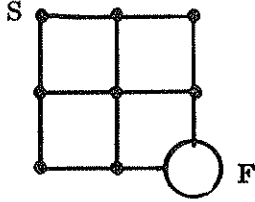

Find the number of ways for J. Walker to go from S to F. Follow the rule above.

337.

Path	Solution: use arrows	Number of ways

338.

Path	Solution; use arrows	Number of ways
		

339.

SUMMARY Fill in .

5.7 PYTHAGORAS AND THE JIG-SAW

Two squares within a square you soon will see,
By putting these pieces back correctly .

Use colored cardboard .

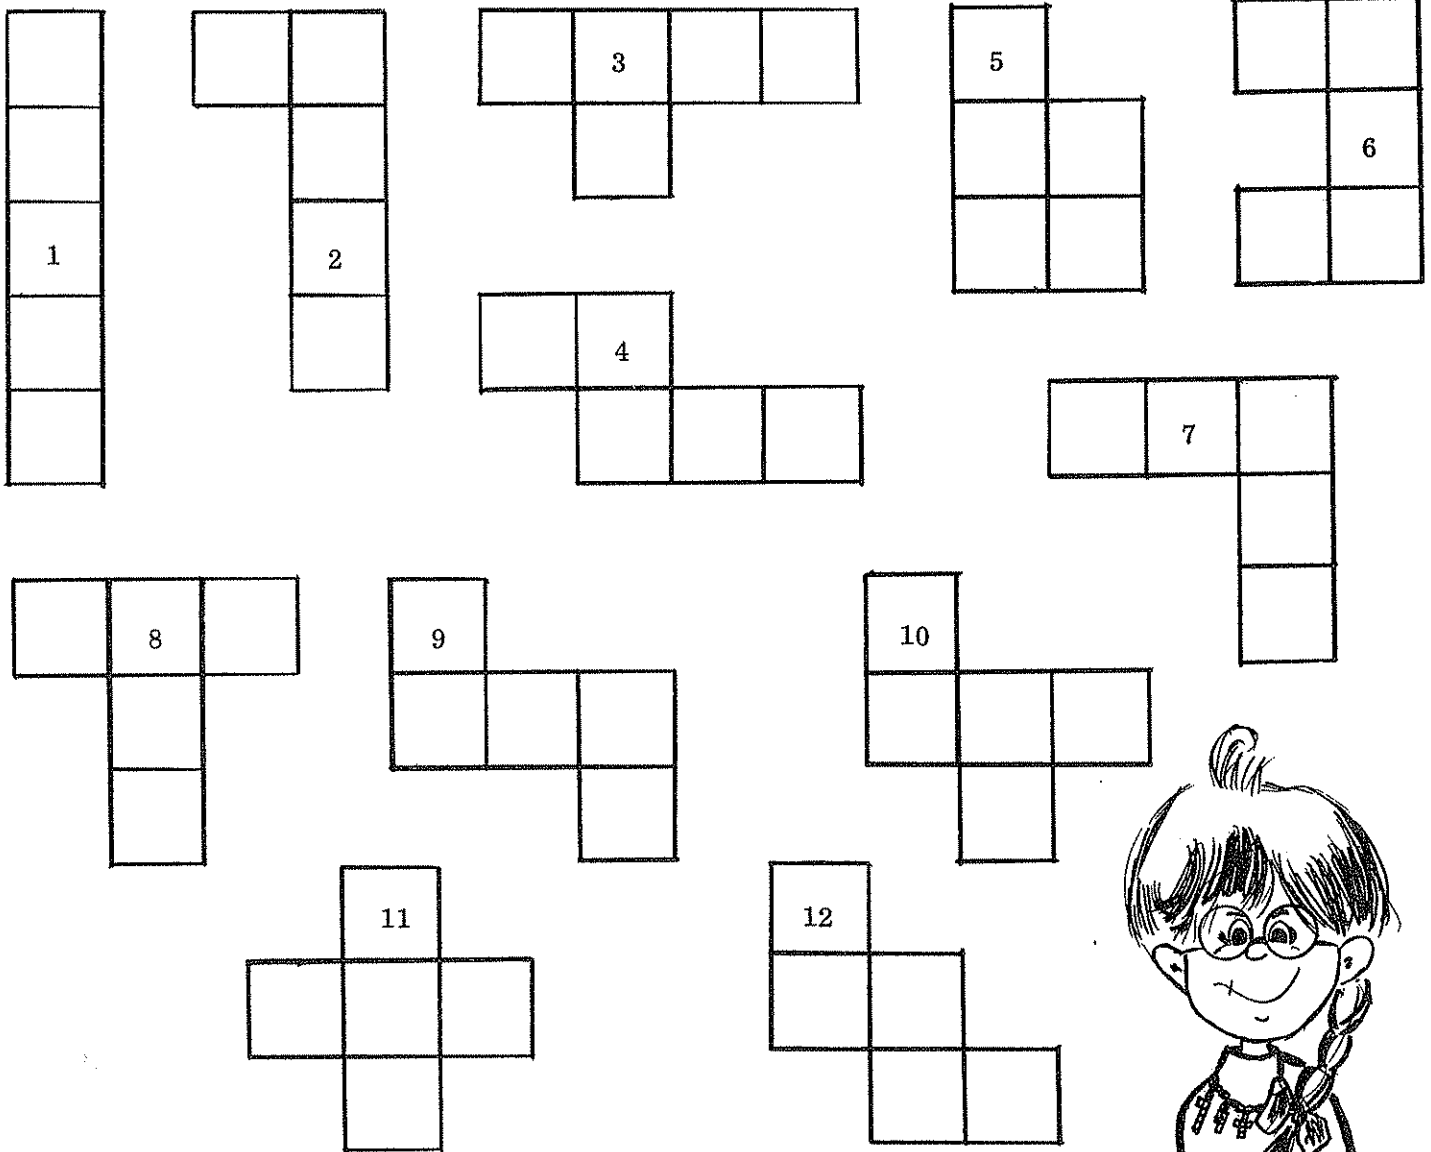

Put all 9 pieces together to make the square below . They will all fit exactly .

340.

5.8 PENNY PENTOMINO AND AREAS

Here is a set of 12 pentominoes. Each one is numbered.
Use cardboard. Make an exact copy of each pentomino.

With pentominoes, different areas Penny could cover
In one or more ways. It's fun as you too will now discover.

Find pentominoes to cover the following areas. No pentomino can be used twice in a problem.

Example

Problem : 3 by 5

Solution : 3 by 5 Use 4, 5, 6.

Follow example on page 94.

341. 5 by 4 Solution:

342. 5 by 5 Solution:

343. 5 by 6 Solution:

344. 5 by 7 Solution:

345. 5 by 8 Solution:

346. 5 by 9 Solution :

347. 3 by 10 Solution :

348.

For the expert.

Use all 12 pentominoes

How do I love Math ?
Let me count the ways -
But nay, I could not do that
In the time of all my days !
